A Job Ready Bootcamp in C++, DSA and IOT Pattern Problems

Write a program to draw the following patterns:

1

2

3.

```
#include<stdio.h>
            if (j <= 6 - i)
               printf("*");
                printf(" ");
       printf("\n");
Output:
```

4

```
******

*****

****

**

***

***
```

```
9.
#include <stdio.h>
        for (j = 1; j \le 7; j++)
                    printf("%d", k);
                     if (j == 4)
                    printf("%d", k);
                printf(" ");
            printf("\n");
Output:
1234321
12321
 121
```

```
k = 1;
                    printf("%d", k);
                    if (j == 4)
                    printf("%d", k);
                printf(" ");
Output:
1234321
123 321
    21
12
```

```
#include <stdio.h>
                   printf("%c", k);
                   printf("%c", k);
```

```
#include <stdio.h>
int main()
                 if (j <= 7)
                    printf("%c", k);
                    if (j == 7)
                    printf("%c", k);
                printf(" ");
       printf("\n");
Output:
ABCDEFGFEDCBA
ABCDEF FEDCBA
ABCDE
        EDCBA
ABCD
         DCBA
ABC
AΒ
```

```
#include <stdio.h>
        for (j = 1; j \le 5; j++)
            if (j <= i)
                 if ((i == 3 \&\& j == 2) \mid | (i == 4 \&\& (j == 2 \mid | j == 3)))
                     printf(" ");
                     printf("*");
                printf(" ");
        printf("\n");
Output:
```

```
#include <stdio.h>
int main()
            if (j >= 6 - i \&\& j <= 4 + i)
|| (i == 4 && (j == 3 || j == 4 || j == 5 || j == 6 || j == 7)))
                    printf(" ");
                    printf("*");
                printf(" ");
       printf("\n");
```

```
for (j = 1; j \le 19; j++)
        if ((j >= 4 - i \&\& j <= 6 + i) || (j >= 14 - i \&\& j <= 16 + i))
            printf("*");
            printf(" ");
            if ((j >= 1 \&\& j <= 6) \mid | (j >= 13 \&\& j <= 19))
                printf("*");
                if (j == 7)
                    printf("%c", 77);
                else if (j == 8)
                    printf("%c", 121);
                else if (j == 9)
                    printf("%c", 83);
                else if (j == 10)
                     printf("%c", 105);
```

```
printf("%c", 71);
                        if (j \ge i - 3 \&\& j \le 23 - i)
                           printf("*");
                            printf(" ");
   } // Outer for loop end
Output:
```
